

Upper Austria

Have you ever wondered where you can do all the activities you have ever dreamed of? Then visit Upper Austria with all its wonderful and stunning lakes, rivers, mountains, villages, cities, museums and its natural beauty. And if you are now about to argue that we have no connection to the sea, you are right, but let us remind you that we are blessed with this beautiful landscape, dotted with breathtaking lakes, like lake "Hallstättersee".

Lake "Hallstättersee" is located in the beautiful town "Hallstatt", which is also known for its old and famous centre. In the city you can visit traditional and peaceful cafés, as well as typical Austrian restaurants. And if you want to escape the crowds, you can book a boat tour to explore the charming environment and the idyllic mountains and woods. As already mentioned, in this well-attended and bustling town, you can find and explore the salt mines, which are an important part of the history of Hallstatt.

Another gem that upper Austria has to offer is the majestic mount "Dachstein". If you want to visit this spectacular mountain, do not miss out on the enormous ice caves, which are called "Rieseneishöhlen", and on taking a look at the unique view from "The Five Fingers" viewpoint. Maybe you are wondering what Austrians do in summer, because we are a landlocked country. But the solution, as already mentioned before, are these breathtaking lakes, for example lake "Wolfgangsee", "Hallstättersee", "Attersee" and a lot more.

Austria is very versatile, especially Upper Austria, with its capital city "Linz", which offers a wide range of historical and exciting things to go sightseeing to. If you want to have a gorgeous view of the city, it would be possible for you to take a short boat ride on the popular Danube. Linz has to offer numerous wonderful churches, for example the "Mariendom", which is located centrally in Linz. Another well-known church is the one on top of the hill "Pöstlingberg". It is a well-attended and beautiful church. The Linzer "Grottenbahn" is a tourist fairy-tale world on the "Pöstlingberg". An electrically powered train in the shape of a dragon named "Lenzibald" travels on a circular track through the outer ring of the historic defence tower. In order to complete your perfect vacation or trip to "Linz", you should visit the famous Plague Column on the main square named, "Pestsäule" in German, as well as the museum in the popular castle: the "Schlossmuseum".
